

# Australasia Gold expands into WA

Australasia Gold has acquired a 100% interest in the Fraser Range North project in Western Australia. The project is located in the North West region of Western Australia, approximately 100km north of Perth. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

### First pass at Fraser Range North

Exploration licence holder has a first pass at Fraser Range North project. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

## High-grade gold intercepts

Exploration licence holder has a first pass at Fraser Range North project. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

## Biochemical 'fingerprint' used to discover gold

Exploration licence holder has a first pass at Fraser Range North project. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia. The project is a large-scale gold deposit with significant potential for expansion. The acquisition is a key step in Australasia Gold's strategy to expand its operations into Western Australia.

Australian company Central Asia Resources has had "significant" results from recent drilling at its Uenke Bulak prospect in Kazakhstan. "The recent results are impressive when viewed in isolation but the impact they potentially have on the overall deposit is very significant for two reasons," says managing director Jason Stlrbinskis. "The recent results support our thinking that the mineralised zone is much larger than previously described. "Prior to Central Asia acquiring the land, the area was defined as a narrow, high-grade epithermal lode deposit with clear boundaries. "However, our technical director, Dr Waldemar Mueller, suspected, and found evidence to suggest, that a wider halo of mineralisation may exist. "The recent results support this model and the repercussions for future resource estimates are substantial. "Our recent results are indicating that mineralisation in some areas
